STATE CLEARINGHOUSE

NEWSLETTER

September 16-30, 2006

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 16-30, 2006.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003
To: All CEQA Lead Agencies
From: Terry Roberts, Director, State Clearinghouse
Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2005**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

SUMMARY OF CEQA DOCUMENT SUBMITTALS BY YEAR AND BY TYPE

<u>Documents Received on Monday, September 18, 2006</u>			
2006041056	<p>University of La Verne Master Plan La Verne, City of La Verne--Los Angeles</p> <p>The proposed project consists of a proposal to modernize and expand facilities to meet existing and future needs of the college. The project is expected to result in a net increase of approximately 50,700 square feet of building area, 50 additional dormitory beds, and 200 to 300 additional parking spaces. Approval of the project will require the following three entitlements from the City of La Verne: (1) a certified EIR, (2) CUP for approval of the Master Plan, and (3) amendment to the Lordsburg Specific Plan to increase the height limitations within the Institutional district from 35 feet to 54 feet.</p>	EIR	11/01/2006
2006091087	<p>Zone Change Case No. 24; Tentative Parcel Map 10848, Map 237-34 Kern County Planning Department --Kern</p> <p>Applicant proposes to change the zone classification to C-2 PD FPS (General Commercial - Precise Development Combining District - Secondary Floodplain Combining) District and a Tentative Parcel Map 10848 proposing to divide 12.65 acres in order to create ten commercial lots ranging in size from 20,000 sq. ft. (net) to 33,844 sq. ft. (net) with a designated remainder. No specific development is proposed at this time.</p>	MND	10/17/2006
2006091091	<p>TT-06-053 - Proposed Modification and Time Extension of Approved Tentative Tract TT-03-018 (Tract 15085) Victorville, City of Victorville--San Bernardino</p> <p>TT-06-053 - a modification and 3-year time extension to allow for the recordation of approved Tentative Tract TT-03-018, a 244-lot single-family residential subdivision on 64 gross acres.</p>	MND	10/17/2006
2006091092	<p>In-Situ Source Area Remediation Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --San Bernardino</p> <p>PG&E proposes to inject food-grade reactants to groundwater at it's Hinkley Compressor Station to clean up the hexavalent chromium plume in the source area.</p>	MND	10/17/2006
2006092082	<p>Rezoning of 291 Evandale Site to R4 Multi-Family Zoning Designation Mountain View, City of Mountain View--Santa Clara</p> <p>The proposed project would rezone the site to the R4 zoning designation, which would allow a maximum density of 60 units per acre, or up to 178 units on the site. The project would require an amendment to the zoning map and an amendment to the General Plan Land Use Map to change the land use designation to High Density Residential. The applicant proposes a development consisting of 144 condominium units in a three-story building with partially underground parking. Residential development as proposed would result in the demolition of 64 existing two-story apartments and carports.</p>	MND	10/17/2006

<u>Documents Received on Monday, September 18, 2006</u>			
2006092091	Pigeon Point Public Access Improvement Project San Mateo County Unincorporated--San Mateo The proposed phased development project includes three new parking areas, (labeled Parking Areas A, B, and C), road crossings and trails connecting these three parking sites with the Pigeon Point Light Station, the closure of the northern intersection of Pigeon Point Road with Highway 1, removal of the existing portable toilets at the Light Station and construction of a new two-unit restroom located near Parking Area A, restoration of the native coastal scrub landscape in areas currently occupied by non-native ice plant or denuded by uncontrolled parking to the west of the Light Station, and a decomposed granite overlook area within the restored habitat area. Only Parking Area A and its associated improvements have a current development application under review. Proposed Parking Areas B, C, and the closure of Pigeon Point Road with Highway 1 are potential future, long-term developments.	MND	10/17/2006
2006092092	Water Replacement Project Willow County Water District Ukiah--Mendocino Replace 100,000 gallon water tanks with 350,000 gallon tanks and replace 200-foot delivery line.	MND	10/17/2006
2006092094	Blue Oaks Plaza Roseville, City of Roseville--Placer 17 office buildings and 2 retail buildings on 11.9 acres in the North Industrial Area of Roseville.	MND	10/18/2006
1998092032	Camp Meeker/Occidental Wastewater Reclamation Project Camp Meeker Recreation And Park District --Sonoma The proposed project would convey sewage from Camp Meeker and Occidental to the RRCSD WWTP. A new collection system would bring Camp Meeker sewage to a central transfer station. Occidental would continue to use its existing collection system, which is scheduled for renovations that will occur under a separate project. The main would be constructed along Bohemian Highway, cross the Russian River mounted under the Monte Rio Bridge, follow Highway 116 past Northwood, pass under the Russian River through an existing pipe casing, and terminate at the RRCSD WWTP near Vacation Beach. Camp Meeker and Occidental wastewater would be commingled with other wastewater collected by the RRCSD system for treatment, storage, reuse and discharges.	NOP	10/30/2006
2003062127	Del Rio Hills Planned Unit Development Rio Vista, City of Rio Vista--Solano The project would generate approximately 2,248 dwelling units including, low, low-medium, and high density housing. In addition, the project includes approximately 20.5 acres of commercial development area, 110.4 acres of parks/open space, and 21.9 acres of public facility space.	NOP	10/17/2006

2006092090	General Plan Amendment 2005-0010 and Zone Change 2005-0009; Waltz Yuba County --Yuba A request to change the General Plan designation and zoning of the two parcels APN 014-280-064 and 014-280-060 located on both sides of Forty Mile Road, adjacent to and east of the interchange with SR-65. The project site is located southeast of the community of Olivehurst. The current General Plan designation of these parcels is Planning Reserve. The project proposes to change the designation to Community Commercial. The project also proposes a change in the zoning of both parcels, from the current M1 (General Industrial) to C-UP (General Commercial-Use Permit).	Neg	10/17/2006
2006092093	North Table Mountain Ecological Reserve Land Management Plan Fish & Game #2 Oroville--Butte North Table Land Management Plan describes the resources present on site and establishes goals and guidelines for operation. Primary activities described for the Reserve are protection and enhancement of native vegetation, and wildlife, continuance of an existing grazing program and public use.	Neg	10/17/2006
2005051011	Recycled Water Distribution Project Mammoth County Water District Mammoth Lakes--Mono MCWD proposes to construct a distribution system for delivery of recycled water. This document tiers off of a 1998 Final Program EIR/EA that addressed the overall Reclaimed Water Project of which this project is a part. The project would require improvements at the MCWD wastewater treatment plant, along the distribution pipeline alignments, and at the three irrigation customer sites (Sierra Star Golf Course, Snorcreek Golf Course, and Shady Rest Park).	SBE	11/01/2006
1992041089	Hanson Aggregates Major Use Permit and Reclamation Plan, Baxter Drilling Company Major Use Permit and Reclamation Plan San Diego County, Department of Planning and Land Use LAKESIDE--San Diego The proposed project is a Modification to the existing approved Major Use Permit (P89-033) for the M.J. Baxter Drilling Company explosive storage and extraction of aggregate resources. The modification of the Major Use Permit (MUP) would allow continued explosive storage for another 5 years pursuant to Section 6904 of the Zoning Ordinance. The MUP Modification would also modify the MUP boundary to exclude areas that have been previously mined and have since been reclaimed in conformance with an approved Reclamation Plan (RP93-001) into building pads (Pads 2, 3, 4, and 5).	NOD	
1997102039	Elloway Subdivision Marin County NOVATO--MARIN The project is a subdivision development. As part of the proposed Elloway Subdivision project, the applicant proposes to install a two lane bridge and stabilize two sections of eroding stream bank by installing rock revetments adjacent to the development lots. Work involved includes the following: removing the existing bridge and associated abutments and placing new bridge and abutments in the vacated area, pruning of existing riparian vegetation, and installation of rock rip rap at the revetments. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number	NOD

	320 acres; and from Map Code(s) 7.1/4.4 (Light Industrial - Comprehensive Planning Area) to Map Code(s) 8.1 (Intensive Agriculture) on approximately 320 acres; and from Map Code(s) 8.5/2.85 (Resource Management - Noise/Military Flight Operations) to Map Code(s) 8.1/2.85 (Intensive Agriculture - Noise/Military Flight Operations) on approximately 300 acres; and from Map Code(s) 8.5/2.85/2.6 (Resource Management - Noise/Military Flight Operations - Erosion Hazard) to Map Code(s) 8.1/2.85/2.6 (Intensive Agriculture - Noise/Military Flight Operations - Erosion Hazard) on approximately 50 acres and to amend the Circulation Element of the Willow Springs Specific Plan to eliminate arterial and collector alignments affecting the 640 acres of the project site and to revise plan policies to reflect these changes; inclusion of approximately 360 acres within the boundaries of an Agricultural Preserve.		
2005121083	Petakovich TPM (TPM 20810RPL1/ER04-08-006) San Diego County Department of Planning and Land Use Escondido--San Diego The proposed project will be a minor residential subdivision of 6.7 acres that will be split into 4 parcels with a minimum lot size of 1.00 acre each and a remainder parcel measuring 2.14 acres. There is an existing single-family residence on the remainder parcel. The new parcels will contain pads for single-family residences. The parcels are approved for septic and water service will be provided for by the Fallbrook Public Utility District. The current zone is A70 (Limited Agriculture), which requires that a net minimum lot size of 1 acre be maintained. The entire project will be served by the following districts/agencies: Escondido Union Bear Valley Elementary/Union High School, City of Escondido Utility District, and the Escondido Fire Protection District.	NOD	
2006042054	Chevron U.S.A. Inc., Richmond Refinery Toxic Substances Control, Department of Richmond--Contra Costa Issuance of a permit for continued treatment and storage of hazardous wastes onsite at the Chevron U.S.A., Inc. Richmond Refinery under the Health and Safety Code, Division 20, Chapter 6.5 and the California Code of Regulations, Title 22, Division 4.5. The facility stores and treats hazardous wastes which are generated onsite in a permitted hazardous waste treatment and storage facility. The wastes would include acids, bases, and reactive chemicals. These wastes can be stored at the facility for up to one year. The storage and treatment facility has five areas and consists of Storage for Drummed Waste, Neutralization, Bulk Liquid Storage and Treatment, Solid Waste Bin Storage and Liquids/Sludge Storage and Treatment.	NOD	
2006052073	Coleman Creek Storm Drain Improvements Rohnert Park, City of Rohnert Park--Sonoma Extension of an existing 48-inch storm drain so that it discharges approximately 700 feet further downstream in Coleman Creek. The storm drain would be extended from the present discharge point under the existing bike path to the new discharge point. The existing storm drain outfall would be abandoned in place. The new storm drain outfall will include a concrete apron approximately 5-feet by 10-feet on the stream bank and rock slope protection covering about 200 square feet on the lower stream bank and channel bottom to prevent erosion. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0425-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, City of Rohnert Park. 2006099019	Zoning Ordinance Amendments, 06-ZOA-01 Buellton, City of Buellton--Santa Barbara Amendment to various sections of Title 19 of the Buellton Municipal Code (Zoning Ordinance).	NOD	
2006098121	Piedras Blancas Elephant Seal Viewing Boardwalk Parks and Recreation, Department of --San Luis Obispo Construct an approximately 1,700 foot long Americans with Disabilities compliant boardwalk with viewing platforms at key locations along an existing trail adjacent to and between two Caltrans operated parking lots in San Simeon State Park to improve public access to the Elephant Seal viewing area. The boardwalk will be constructed of recycled plastic and pressure treated wood to resist decay. The entire boardwalk project will be constructed on upland fill along an abandoned roadbed and adjacent to the existing parking lots. The boardwalk will improve public access, eliminate use of a volunteer trail system, protect natural resources, and provide platforms at key locations for Elephant Seal viewing and interpretation.	NOE	
2006098122	Pond K Dam, No. 1583-003 Water Resources, Department of, Division of Dams Ione--Amador Construction of a 20-foot-high embankment dam to provide additional storage and freeboard at Pond K.	NOE	
2006098123	Vaca-Dixon PGE Substation Channel Sediment Removal Fish & Game #2 Vacaville--Solano Agreement No. 2006-0193-R2.	NOE	
2006098124	Little Chico Creek and Bank Failure Repair 1600-2006-0121-R2 Fish & Game #2 Chico--Butte Immediate repair of a failed gabion retaining wall that confines Little Chico Creek, on Humboldt Road directly across from the City of Chico Police Facility. The bank failure caused three gabions and surrounding bank material to descend into the channel. The City is proposing to repair the 15-foot bank failure by excavating approximately 4-feet below the bottom of the existing creek bed, placing a solid rock bedding of 1/4 ton rocks (voids filled with 3" to 6" rock cobble), and stacking four levels of gabions.	NOE	
2006098125	Cameron Park Footbridge Replacement Project SAA # 1600-2006-0349-R2 Fish & Game #2 --El Dorado Activities include the replacement of the existing 7-foot wide, 94-foot long footbridge with a 7-foot wide, 100-foot long footbridge that meets current safety standards. The new footbridge will be located in the exact alignment as the existing bridge.	NOE	
2006098126	Agreement No. 2006-0106; Portal Forebay Drain Valve Repair Project Fish & Game #4 --Fresno Activities will consist of repairing the drain valve in Portal Forebay Dam, and removal of sediment adjacent to the valve. The forebay will be drained to allow for work in dry conditions. A fish rescue will be implemented when the forebay is	NOE

2004051148	Don Pedro Wastewater Treatment Facility Mariposa County --Mariposa The proposed project includes construction of a new wastewater treatment plant designed to handle 100,000 gallons per day average wet weather flow, a one acre storage pond, and approximately 46 acres of spray or drip irrigation facilities to dispose of treated effluent. Construction will occur on the County's two forty-acre parcels. The State Water Board will only fund wastewater treatment plant capacity to 40,000 gallons per day, consistent with applicable Waste Discharge Requirements.	NOD	
2006021014	The Commons at Chino Hills Chino Hills, City of Chino Hills--San Bernardino The Commons at Chico Hills is a freeway commercial mixed use center development. The proposed uses within the Commons include a home improvement store with a garden center, various retail, restaurant, office, financial, and a hotel. Size of the center will include at least 300,000 square feet but not more than 600,000 square feet of building space. As part of the overall Commons at Chino Hills Project, approval of Specific Plan 06-01, Tentative Parcel Map 18236, Site Plan Review 06SPR02 and associated Sign Program were required.	NOD	
2006021132	Reedley Waste Water Treatment Plant Reedley, City of Reedley--Fresno The City of Reedley Wastewater Treatment Plant is located at 1295 W. Olson, Reedley, CA 93654, Fresno County. The project consists of the adoption of the proposed 20-year Master Plan for the City of Reedley Wastewater Treatment Plant (WWTP) and the associated expansion. The project site is located within the boundaires of the WWTP, which is approximately 1.5 miles southwest of the center of the City, on the west bank of the Kings River, south of Olson and Huntsman Avenues. The proposed project will increase WWTP capacity to 7.0 million gallons per day (mgd) in two phases over the 20-year planning period. Phase I will increase capacity to 5.0 mgd and should provide sufficient capacity through the year 2022. As maximum month flows approach 5.0 mgd, the City would begin planning, designing and construction of Phase 2 which will increase capacity to 7.0 mgd.	NOD	
2006042025	Ten Mile River Bridge Seismic Retrofit/Replacement Caltrans #1 Fort Bragg--Mendocino The proposed project involves replacement of the Ten Mile Bridge at Route 1 in Mendocino County, between KP 111.7/112.9 (PM 69.4/70.1). The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0338-3 pursuant to Section 1602 of the Fish and Game Code to Ms. Lena Ashley, California Department of Transportation. 2006061087	Gamble Lift Station, Sewer Line and Bobbitt Avenue Sewer Lines Western Municipal Water District Riverside--Riverside The Lift Station is expected to consist of a concrete block one-story structure above grade with part of the lift station to be as much as 30 feet below grade. The structure will be approximately 502.7 square feet (26' x 19' 4"). The structure will incase a wet well, two 50-horsepower submersible pumps, a motor control center, a small electrical panel, auto controls, a stand-by generator, a 1,000 kilowatt SCE transformer and a motor on top of the pump. Approximately 1,560 linear feet of force main, and 2,730 linear feet of sewer line that will enter and leave the lift station at various depths will be constructed within existing right-of-way.	NOD	
2006061091	Sycamore Landfill Tonnage Increase San Diego, City of San Diego--San Diego Revision to the State Solid Waste Facility Permit (SWFP # 37-AA-0023) for Sycamore Landfill to allow for an increase of 665 tons per day in the maximum daily tonnage of municipal solid waste for a total of 3,965 tons per day for disposal. Currently, the permitted maximum daily tonnage for disposal is 3,300 tons per day. The project also is proposing the elimination of the permitted maximum monthly tonnage limit of 75,833 tons; a correction in the remaining site capacity from 20,600,000 cubic yards to 48,124,462; resulting in an updated closure date from 2016 to 2031. The permitted maximum daily vehicle traffic allowance would remain unchanged and no change in land use is proposed.	NOD	
2006071032	Interstate 5/State Route 52 Maintenance Project San Diego, City of --San Diego Site Development Permit to allow for sewer maintenance activities to clean and televise sewer infrastructure within the Rose Canyon Open Space Park. The project would consist of gaining access to a buried manhole located at a T-section of two perpendicular sewer mains. Access to the manhole would occur through utilization of an existing dirt road/park trail from the intersection of Bothe Avenue and Bloch Street. Construction work would include the extension of the existing access path down an incised bank of Rose Creek; temporarily backfilling a portion of the creek bed to allow for crossing; temporarily installing corrugated steel plates; excavation of the buried manhole and then raising of the manhole approximately 3 feet.	NOD	
2006071125	Barstow to Daggett Corridor Capacity Improvements, Triple Tracking from about Mile Post (MP) 737-67 to MP 743.93, BNSF Railway Company (BNSF) Barstow, City of Barstow--San Bernardino Within the Main East-West Railroad Corridor, the operating efficiency of rail service will be enhanced by implementing a variety of proposed rail corridor improvements from Barstow to Daggett. The range of potential improvements include: a) Installation of a new third main track in selected areas (triple tracking), b) Installation of new set-out track, c) Installation of crossovers (connections between tracks), d) Reconfiguration of existing industry tracks, e) Extension or upgrading track structures and special track work, f) Extension or upgrade of existing sidings, g) Upgrading signal systems,	NOD

	h) Construction of new bridges (up to four new bridges), and i) Acquisition of an encroachment permit for staging/lay down areas on City of Barstow property.		
2006098138	Spanish Creek Livestock Tentative Parcel Map/Planned Development Permit - TPM/PD 6-05/06-20 Plumas County Planning Department Quincy--Plumas Tentative map dividing 277.12 acres into four parcels of 51.13 acres, 23.27 acres, 21.97 acres, 59.05 acres, and a remainder of 121.70 acres. The Planned Development Permit is to allow phasing of final maps and deferral of road improvements.	NOE	
2006098139	Butte Creek Bank Protection Project Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Butte The project purpose and need is to restore 170' of stream bank using rock slope protection and woody cuttings. The project will involve re-filling the eroded area with sand and gravel and then armoring with 1/2 ton rock slope protection.	NOE	
2006098140	Big Chico Creek Bank Protection Project Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Butte The project purpose and need is to restore 300' of stream bank using rock slope protection and woody cuttings. The project will involve re-filling the eroded area with sand and gravel and then armoring with 1/2 ton rock slope protection.	NOE	
2006098141	Transfer of Coverage to El Dorado County APN 26-154-28 (Riva) Tahoe Conservancy South Lake Tahoe--El Dorado Project consists of the sale and transfer of 400 square feet of potential coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the hydrologically-related area.	NOE	
2006098142	Dept. of Industrial Relations (DIR) 4th & 6th Floor Alterations - Elihu Harris Building Project General Services, Department of Oakland--Alameda The proposed project would renovate approximately 28,245 gsf on the 4th and 6th Floors of the Elihu Harris Building in Oakland for the Department of Industrial Relations (DIR). Project renovations include the removal of some existing walls, construction of some new walls, and modification of infrastructure utilities, I.T. (telecom/data), security, modular systems furniture (MSF) reconfiguration, paint and carpet. The project is needed to improve the efficiency of the use of space and resources through tenant improvements that will accommodate associated MSF and supporting infrastructure modifications. The Elihu Harris Building is a State-owned building that is well served by public transit. The project involves a negligible expansion of current use.	NOE

	full-time equivalent student population of 17,674 by 2015 - an increase of approximately 2,440 students (16 percent) from the current population. However, the primary goal of major new projects is campus modernization and upgrade of existing outmoded facilities. The proposed action is designed to achieve the Master Plan's goal of pulling together parts and pieces of the various departments into more logical placement on campus. The proposed action would divide the campus into six primary neighborhoods which would overlap to create areas of mutual interest and shared facilities.		
2006052121	Wastewater Treatment and Reclamation Plant Upgrade Project St. Helena, City of St. Helena--Napa The proposed project will upgrade the City's wastewater treatment and reclamation plant (WWTRP) to meet waste discharge requirements issued by the SFBWRQCB in order to be consistent with the City of St. Helena's General Plan (1993a).	EIR	11/03/2006
2006092101	TPM2005-0043 & TPM2006-0053 Yuba County --Yuba The Lindhurst Retail project includes the following properties: APNS 021-440-032, 033, 034, 041, and 021-490-001 to 080. These properties total 9.27 acres, which are currently designated as Community Commercial by the General Plan and zoned Commercial. All of these parcels are vacant. Two tentative parcel map applications have been received from Milestone Associates, proposing to divide a 9.27-acre property into 10 parcels for commercial development. One application proposed a four lot parcel map in the Linda Fire District while the second application proposes a six lot parcel map in the Olivehurst Fire District. On seven of the parcels (~ 5.9 acres), seven retail buildings are proposed for a total retail area of 57,625 square feet. Individually these buildings would size from 6,000 square feet to 10,500 square feet. Additionally, 231 parking spaces are proposed to serve these seven retail buildings. Two of the proposed parcels (~ 1.6 acres) would serve as fast food restaurants. Each restaurant would be 3,200 square feet in size; 70 parking spaces are proposed for both restaurants. The last parcel (1.6 acres) is designated as a 32,000 square foot, 60-room hotel. A total of 416 parking spaces are proposed to serve the parking needs generated by the shopping center project.	MND	10/25/2006
2006091106	County of Ventura Santa Rosa Park Equestrian Facility, Case No. LU04-0064 Ventura County Thousand Oaks--Ventura The project is an expansion of use on the existing Santa Rosa Park property and proposes to add a Day-Use Equestrian Facility. Two new Arenas, one rectangular Trail Training Pen, and one Round Training Pen are proposed.	Neg	10/19/2006
2006092098	Toyota Training Center Expansion San Ramon, City of San Ramon--Contra Costa The applicant is proposing to construct an 11,200 sq. ft. Training Center expansion at an existing Toyota office, warehouse, and training facility. The expansion would require the removal of a portion of an existing parking lot to accommodate the training center expansion.	Neg	10/19/2006

2006092099	<p>Michelon General Plan Amendment, Rezone and Parcel Map Weed, City of Weed--Siskiyou</p> <p>The proposal project is a minor subdivision of 91.95 acres to create four parcels and a remainder resulting in the following: Parcel 1 - 22.83 acres, Parcel 2 - 46.12 acres, Parcel 3 - 0.66 acre, Parcel 4 - 0.75 acre and Parcel 5 - 21.59 acres. Parcel 5 would be the designated remainder. The entire 91.95-acre property is designated Residential Single Family - Low Density (RL) per the City of Weed General Plan Land Use Element (2003) and zoned Low Density Residential (R-1) consistent with the land use designation. In addition to subdividing the property, the applicant has requested that they be allowed to use a portion of the proposed 22.83-acre parcel (Parcel 1) as an equipment yard for their logging/trucking operation. While this would not be permitted within the existing R-1 district, the City of Weed zoning ordinance does permit equipment yards within the R-R district upon issuance of a conditional use permit. Therefore, in order to allow a portion of the proposed 22.83-acre parcel (Parcel 1) to be utilized as described above, the applicants request a general plan amendment to designate Parcel 1 Rural Residential, as well as a rezone of Parcel 1 to Rural Residential Agricultural.</p>	Neg	10/19/2006
2006092100	<p>Red Hawk Vineyard Conversion #P06-0146-ECPA and Site Improvements Napa County Conservation Development & Planning Department Napa--Napa</p> <p>The project includes earthmoving activities and installation and maintenance of erosion control measures associated with development of 5-acres of new vineyard (3.8 net vine acres), the reconstruction of an existing reservoir, and driveway relocation on a parcel totaling 14.99-acres. The site plan designates three vineyard blocks, the reconstruction of an 8-acre foot reservoir, and driveway relocation on topography that ranges from gently to moderately sloping lands (typical slopes from 7% to 17%), at elevations between approximately 730 and 770 feet above mean sea level.</p>	Neg	10/19/2006
2003031049	<p>Vesting Tentative Tract Map 6148 Bakersfield, City of Bakersfield--Kern</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Centex Homes. The applicant proposes to construct a reinforced concrete open channel storm water outfall structure in a wash channel adjacent to the Kern River. The structure will convey runoff from a proposed housing development into the Kern River.</p>	NOD	
2004062016	<p>Baldwin Hallwood Mine Expansion Yuba County Marysville--Yuba</p> <p>The proposed operation (Project) consists of sand and gravel extraction in a manner similar to that performed at Baldwin's existing Hallwood Plant. The mined materials will be processed at Baldwin's existing aggregate plant immediately south of the Project Site's southern boundary. This project is an expansion of an existing quarry. Baldwin's application proposes one vertical phase and 11 lateral phases with active mining at the project site for 22 to 44 years.</p>	NOD

2005122034	Christie Minor Subdivision Humboldt County Community Development Services Eureka--Humboldt The minor subdivision of a +/- 91 acre parcel into one +/- 88 acre ag parcel and a +/- 3 acre residential parcel. Parcel 1 (3 acres) is already developed with a residence and barn. The larger parcel (Parcel 2) will remain vacant and be used for grazing purposes only. As a condition of the subdivision, the applicant agrees to convey all development rights on Parcel 2 until such time as Marsh Road can accommodate further development. The existing residence on Parcel 1 is served by community water and sewer.	NOD	
2006041015	State Route 91 (SR-91)/Van Buren Boulevard Interchange Improvement Caltrans #8 Riverside--Riverside The project will provide ramp improvements, including an eastbound SR-91 hook on-ramp from Indiana Avenue west of Van Buren Boulevard and a new SR-91/Van Buren Boulevard overcrossing (widened from four to six through lanes plus dedicated turn lanes) that will accommodate the ultimate 10-lane SR-91 facility. The ramp improvements will accommodate the recently completed SR-91 auxiliary lane-widening project. The primary purpose of the project is to relieve existing traffic congestion and accommodate future projected traffic volumes at the SR-91 interchange with Van Buren Boulevard.	NOD	
2006071020	Imperial Promenade La Habra, City of La Habra--Orange The project site was previously occupied by a Super K-Mart store, which has subsequently been vacated. The project proposes to utilize the existing commercial structure for shopping center tenants by partitioning the interior, enclosing the uncovered portions of the garden center for retail space and updating the architectural elements on the exterior of the building. In addition, two new development pads will be constructed with free-standing buildings to accommodate additional commercial tenants. The vacated building contains a total floor area of 182,983 square feet. The proposed additional commercial development would result in a maximum total building floor area of 218,321 square feet. The parking and landscape areas will also be upgraded and enhanced to improve the aesthetic quality of the project site.	NOD	
2006071027	Village at Lakeshore Lake Elsinore, City of Lake Elsinore--Riverside The proposed project consists of Tentative Parcel Map 33267 Specific Plan (SP 2005-01), Zone Change (ZC 2005-01), Conditional Use Permit (2005-21), and Design Review (R2005-09) to develop 146 medium density residential units on approximately 19.7 acres. Residential units will consist of attached condominium two-story buildings, with individual attached garages.	NOD

2003102002	Sutter Medical Center, Sacramento (SMCS) Project and the Trinity Cathedral Project Draft EIR Sacramento, City of Sacramento--Sacramento The SMCS project includes development of a new Women's and Children's Hospital, medical office building(s), parking garage, and 32 units of housing. Due to the Court's ruling, a Revised EIR is being circulated that addresses air quality and traffic issues.	EIR	11/06/2006
2006012041	Eagle Lodge Base Development Project Mammoth Lakes, City of Mammoth Lakes--Mono The 8.67 acre site is located at the intersection of Meridian Boulevard and Majestic Pines Road and at the base of the Eagle Express Chairlift (Chair 15). The site includes private land and approximately 4.1 acres of lands administered by the Inyo National Forest. MMSA proposes to develop the Eagle Lodge Base Area, which would provide a permanent lodge facility on the site. The facility is a mixed-use development with a condominium/hotel and a mix of recreational-related uses, including food service, rental/demo/repair shop, retail, ski school and day care, ticketing/lobby, administrative space, and restrooms. In addition, the lodge would include a convenience market, restaurant, day spa and locker club. The project includes the removal of the existing temporary facility and regarding of that area. Development is anticipated to occur in one phase over a two-year timeframe beginning in Spring 2007 and ending in Spring 2009.	EIR	11/06/2006
2006062113	North County Recycling Center and Sanitary Landfill Permit Revision San Joaquin County Lodi--San Joaquin The SJCDPW proposes to revise the existing SWFP for the NCRC&SL to: - Increase the maximum permitted fill elevation (height) to 420 feet above mean sea level (msl) from the current limit of 190 feet msl. - Increase the maximum daily disposal limit from 825 to 1,200 tons of refuse per day. - Increase the limit of incoming refuse vehicles from 600 to 850 per day. - Restrict the hours of noise generated by heavy equipment use in accordance with the San Joaquin County Development Title (Chapter 9-1025.9) when such noise impacts neighbors. If no residences are impacted, then the hours during which heavy equipment could be used would not be restricted.	EIR	11/06/2006
1995083033	September Ranch Subdivision Monterey County The proposed project involves the subdivision of 891 acres into 94 market rate residential lots, 15 units of inclusionary housing, and a 20.2 acre lot for the existing equestrian facility; 782.8 acres is proposed as open space. Other appurtenant facilities and uses would include separate systems for the distribution of potable water, water tanks for fire suppression, a sewage collection and treatment system, waste water treatment system, drainage system, internal road system, common open space, tract sales office and security gate. 2005092021	San Pablo Dam Seismic Upgrade East Bay Municipal Utility District --Contra Costa The purpose of the San Pablo Dam Seismic Upgrade Project is to improve the embankment and foundation soils downstream of the Pablo Dam to withstand shaking generated by the maximum credible earthquake on the Hayward-Roger Creek fault without significant strength loss, to limit permanent deformation or settlement at the dam crest to acceptable levels, and to prevent damage to the outlet works, thereby ensuring that the risk of flooding to downstream communities after a seismic event is significantly minimized. The proposed project involves using large, multiple auger equipment to inject and mix cement grout into portions of the dam foundation material, and the construction of a larger buttress fill on the downstream face of the dam.	FIN	
2005111115	City of Claremont General Plan Claremont, City of Claremont--Los Angeles The project analyzed in the Program EIR is the adoption and long-term implementation of the updated Claremont General Plan. The proposed General Plan consists of the following elements and support documents: (1) Land Use, Community Character, and Heritage Preservation; (2) Economic Development/Fiscal; (3) Community Mobility; (4) Open Space, Parkland, Conservation, and Air Quality; (5) Public Safety and Noise; (7) Human Services, Recreation Programs, and Community Facilities; (8) Governance, and (10) Implementation Plan.	FIN	
2003071158	Los Alamitos Pump Station Orange County Long Beach, Seal Beach--Orange, Los Angeles Reconstruction of the existing Los Alamitos Pump Station to provide sufficient pumping capacity for the 100-year storm event and eliminate flooding in the surrounding area. The project would also involve the acquisition of both the Bryant and SCE properties to the west of the existing LARB. The new pump station would be located on the LARB, and would utilize the existing subsurface pipelines that extend from the existing pump station to the San Gabriel River.	MND	10/20/2006
2006091109	SPA #10, ZCC #37, Map 101-23 (Floyd Hinesly) Kern County Planning Department Bakersfield--Kern Amend the Land Use Element of the Western Rosedale Specific Plan from Map Code RR (Rural Residential min. 2.5 ac/unit) to Map Code SR (Suburban Residential max 4 units/ac); and a change in zone classification from E (2.5) RS PE (Estate Residential min 2.5 acres-Residential Suburban-Petroleum Extraction) to E (1/4) (Estate Residential max 4 units/acre).	MND	10/20/2006
2006091115	Goyal Zone Change and General Plan Amendment for Holtville Commercial Plaza Holtville, City of Holtville--Imperial The proposed project consists of the approval of a zone change for the referenced parcel numbers from R-3 Multi-Family to C-2 General Commercial consistent with the recently updated 2003 Holtville General Plan. The zone change and general plan amendment intends to facilitate the development of a strip mall and future commercial development.	MND	10/20/2006

	increase in mining area will be accomplished through the incorporation of three new properties into the project as well as an expansion of mining onto land historically owned by Teichert but previously inaccessible to mining due to site configuration constraints that will be alleviated by the additionally properties in this proposal.		
	Reference SCH# 1995102057		
2006092106	Commerce Station (P06-018) Sacramento, City of Sacramento--Sacramento The proposed project includes the development of a mixed use community. Entitlements are requested to modify the existing land use designations to permit approximately 21.2 acres of new regional commercial uses and approximately 4 acres of new park space. The balance of the site, approximately 155.3 acres, will retain its existing employment center land use designations with minor modifications to the existing employment center densities to maintain an overall balance of employee generating uses on the site. At full build out, the project will include a total of approximately 3,224,380 square feet of mixed use office, retail, support retail, hospitality and residential uses with individual building sizes ranging from one to ten stories in height. It is anticipated that the project will developed in several phases. However, a PUD Special Permit is requested for the immediate development of four mixed use office buildings and associated infrastructure. These buildings are proposed to be two stories in height and will accommodate a total of 168,785 square feet of building space.	NOP	10/20/2006
2003031048	Valley Center Road Bridge Replacement Project San Diego, City of --San Diego The proposed project is to replace an existing structurally deficient bridge that no longer satisfies present day standards for safety. A temporary low water crossing detour road will be constructed to the east (upstream) side of the existing bridge for traffic while the new bridge is being constructed, and temporary culverts will direct stream flow under the detour road.	Neg	10/23/2006
2006091108	Fullerton Redevelopment Project Merger Fullerton Redevelopent Agency Yorba Linda, La Habra, Buena Park--Orange The project will technically amend and merge all four existing Redevelopment Plans and their respective project areas in order to increase the Redevelopment Agency's efficiency in administering redevelopment activities and effectiveness in funding needed development projects throughout the City. The proposed action will not alter the boundaries of the existing project areas. Although no development or construction is proposed at this time, the continued implementation of the Redevelopment Plans is expected to facilitate housing, commercial, office, industrial/manufacturing and public development in the existing project areas in conformance with the Fullerton General Plan and to mitigate various blighting conditions that have been found within the existing project areas. The primary goal of the Redevelopment Plans will continue to be the elimination of physical and economic blighting conditions that hinder the full development of the existing project areas. 2006092105	<p>Gaskins Vineyard Conversion Project #02257-ECPA Napa County Conservation Development & Planning Department Yountville--Napa</p> <p>The proposed project is for earthmoving activity associated with the development of a new +/- 10.4 acre vineyard, including installation of erosion control measures on a 41.31-acre parcel on the north side of Soda Canyon Road, approximately six miles north of its intersection with Silverado Trail, approximately 4 miles northeast of the Town of Yountville. The parcel is located in an Agricultural Watershed (AW) zoning district, with a Napa County General Plan designation of Agriculture, Watershed & Open Space. Erosion control plan #02257 has been prepared. The project would be completed in two phases. A bulldozer would remove the existing brush, trees and large rocks in late spring/early summer. Vegetation would be stock piled and burned on-site. Rock spoils would be stored outside of stream setbacks. Slopes range from 2% to 20%, with an average slope of 6.4%. Soil ripping would be about 12 to 18 inches deep. Vineyard avenues would be 20 feet in width. Water would be provided from an existing well. The erosion control methods include straw bale dikes, straw mulch, water bars and permanent no-till cover crop (70% coverage). Deer fencing would be placed only around vineyard blocks. Fifteen oak and pine trees are proposed for removal. All are fire-damaged and range in size from 13" to 23" dbh. Chemicals used for fertilizing and eradicating of weeds, pests and fungi would be kept in an existing barn.</p>	Neg	10/20/2006

1992063089	Mercer Fraser Co. McKnight Bar Humboldt County EUREKA--HUMBOLDT The project proposes commercial gravel extraction operations, impacting the Trinity River, tributary to Klamath River, Humboldt County.	NOD	
1992083049	The Surface Mining of Sand and Gravel on the Mad River Humboldt County Planning Department --Humboldt The project proposes the annual removal of flood-washed alluvial material for commercial purposes on the Mad River, in Humboldt County.	NOD	
1997109016	The Syar Industries Inc. Mining Use Permit Application Mining and Geology Board, Department of Conservation Healdsburg--Sonoma The project operator proposes to conduct instream gravel mining, by dry gravel bar skimming of aggraded gravel, in Healdsburg adjacent to the Syar plant at Bar 2 and in the Middle Reach in Bar 13 just upstream of No Name pit. Gravel available for skimming will be defined by a plane starting one foot above the water level of the low flow channel (250-300 cfs) at the downstream end and extending upstream at no less than 0.1% until it intercepts the interior slope of the upstream buffer. Install temporary crossings of the Russian River, using flatcar bridges placed over the low flow channel, to gain access to the mining sites. Restore habitat values along the river within the project areas by planting or transplanting native riparian vegetation and removing stands of giant reed, <i>Arundo donax</i> , from the banks of the Russian River in the area of Bars 2, 3, and 4. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0518-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Syar Industries Incorporated.	NOD	
2003091011	Caltrain Extension to Monterey County Project Monterey County Transportation Agency Monterey--Monterey Caltrain extension, three commuter rail stations located respectively at Pajaro, Castroville, and Salinas in Monterey County; a layover facility at Salinas; and minor track improvements and limited equipment acquisition.	NOD	
2004051017	Merced's Logistical Support/Services Facility (LSSF) University of California, Merced Merced--Merced The Logistical Support Services Facilities (LSSF) project was approved in June 2004, to accommodate the program in one building (30,294 gsf). The campus was unable to construct the building for the budgeted amount, and now proposes a different solution to accommodate the program needs. The revised project consists of three metal buildings designed to contain 17,200 asf (21,500 gsf). LSSF "A" would accommodate the majority of the original program elements, including space for Facilities Management and EHS. LSSF "B" would provide additional warehouse and multipurpose space. LSSF "C" would be a separate self-contained EHS materials unit to accommodate hazardous materials. Remaining program elements would be accommodated in existing UC Merced facilities. A converted laboratory in the existing Science and Engineering Building (900 asf) on campus already functions as an EHS materials handling area. The Castle Aviation Center Building 1200 in Atwater, CA provides about 17,100 asf of	NOD

	material and dirt road base over the rock material to fill voids and provide drivable surface for vehicular access. The dirt road provides access for patrol, routine inspection and maintenance of existing underground pipelines that carry public water supplies.		
2006098169	<p>Inspection and Minor Repair of the Lakeview Pipeline Metropolitan Water District of Southern California San Jacinto--Riverside</p> <p>The Metropolitan Water District of Southern California is proposing to dewater the Lakeview Pipeline to inspect and repair a leak at Station 2510+06. Discharge will occur at a maximum of four pumping wells between PC-1 and the San Diego Canal. The inspection will check for the precise location of the leak along the pipeline. Inspection activities necessitate digging three 9-foot deep potholes, 6 inches in diameter, in the vicinity of the leak. Repair of the leak will be accomplished from within the pipe.</p>	NOE	
2006098170	<p>F. E. Weymouth Water Treatment Plant Raw Water Bypass - Final Design Metropolitan Water District of Southern California La Verne--Los Angeles</p> <p>The Metropolitan Water District of Southern California is proposing to prepare final design of a new raw water bypass stubout at the Weymouth Plant. Work on the finished-water side of this connection will be designed and constructed separately in the future. In the event of an extreme event or emergency that impacts the Weymouth Plant's ability to treat water, it may be necessary to bypass the Plant and deliver untreated water into the distribution system. Currently, at the Weymouth Plant, both the raw water inlet pipeline and the Finished Water Reservoir outlet have been blocked stubouts. In an emergency, a short pipe spool could be inserted to connect the two pipelines and bypass the Weymouth Plant. Metropolitan proposes to move forward at this time to take advantage of construction efficiencies and a planned shutdown of the Plant inlet line, and to increase system reliability under emergency conditions.</p>	NOE	
2006098171	<p>F. E. Weymouth Water Treatment Plant Filter Rehabilitation - Preliminary Design Metropolitan Water District of Southern California La Verne--Los Angeles</p> <p>The filters at the Weymouth Plant range in age from 40 to 60 years old. The filters were designed to meet much less stringent performance and water quality standards than exist today. The filters have been retrofitted with dual media to enhance performance. The Metropolitan Water District of Southern California is proposing to remove and replace the media in four filters. This work would create a unique opportunity to test alternate media types and filter appurtenances within the shallow configuration of the Weymouth filter cells. Metropolitan, therefore, intends to rebuild four filters with new media and different configurations of design enhancements, so that the performance of these four filters can be monitored and evaluated during a full-scale demonstration study. During the test period, Metropolitan will assess performance with respect to water quality and the impacts of physical constraints within the existing filter cells, in order to identify the optimal configuration for rehabilitation of the remaining 44 filters. Filter modifications may include alternate types and layers of filter media, a new underdrain system, an air-scour system, and new washwater throughs. Initial efforts will include preliminary design of improvements for all four filters, inspection of the media and underdrains within one filter, and replacement of the filter media in that filter following inspection.</p>	NOE

2006098172	<p>F. E. Weymouth Water Treatment Plant Reservoir Gates Repair - Study Metropolitan Water District of Southern California La Verne--Los Angeles</p> <p>The Weymouth Plant Finished Water Reservoir has three inlet gates, three bypass gates and three outlet gates. All nine gates were originally installed in 1964. Properly functioning gates are required to isolate the reservoir when it is removed from service for maintenance. During routine inspection, the Metropolitan Water District of Southern California detected corrosion of both the gate and its guide at Inlet Gate #2. Metropolitan is proposing to remove Inlet Gate #2 and its operator assembly during a planned Weymouth Plant shutdown and installing a steel drop gate at the same location. Metropolitan is also proposing the in-place inspection of the other eight normally submerged gates during the upcoming Plant shutdown. Based on this inspection, Metropolitan will determine the need for refurbishment or replacement of the remaining gates.</p>	NOE	
2006098173	<p>F. E. Weymouth Water Treatment Plant Basin Inlet Gate - Design and Installation Metropolitan Water District of Southern California La Verne--Los Angeles</p> <p>The Metropolitan Water District of Southern California is proposing the fabrication of a new 10-foot by 15-foot steel drop gate and gate guide for installation during the upcoming Weymouth Plant shutdown, due to corrosion of the existing gate guide, which can no longer accept insertion of a drop gate. Metropolitan is proposing to install an isolation drop gate in the inlet channel to Basins Nos. 5 through 8 to allow continued usage of Basins Nos. 1 through 4.</p>	NOE	
2006098174	<p>Grove Gate and Fence Installation Parks and Recreation, Department of --San Luis Obispo</p> <p>Install an approximately 16 foot metal vehicle gate and approximately 24 feet of adjoining wooden plank fence at the woodlot access driveway adjacent to the Grove Ranger office at Morro Bay State Park to replace the original gate and fence crushed by tree fall. Seven post holes for support posts will be excavated to a depth of three feet. The gate will curtail firewood theft and eliminate unauthorized dumping in the woodlot. Project protects park facilities, protects public health and safety and deters illegal activity.</p>	NOE	
2006098176	<p>PCB Removal Action Work Plan, Souh Pacific Division Laboratory, USACE SPO Toxic Substances Control, Department of Sausalito--Marin</p> <p>This project is the approval of a Removal Action Work Plan (RAW) by the Department of Toxic Substances Control for the removal of Polychlorinated Biphenyl (PCB) contaminated soil from beneath the asphalted alleyway behind the building. Based on site and the removal action goals, approximately 500 tons of soil will be excavated and transported off-site for disposal.</p>	NOE

	dining, divided into up to 35 condominium units (33 office units on the upper floors and one restaurant and one snack shop unit on the ground floor) and a parking plan to base the parking requirements on the peak shared parking requirements of the proposed uses and to pay parking in-lieu fees to compensate for providing less than required parking on site.		
2006091123	County of San Luis Obispo Public Works Department Bridge Street Repair MUP ED99-652 (DRC2005-00237) San Luis Obispo County Cambria--San Luis Obispo Request by the County of San Luis Obispo Public Works Department to reconstruct a portion of Bridge Street. The work will include rebuilding 175 linear feet of failed slope, replacing a 24-inch culvert, installing two-ton rock slope protection, reconstructing 375 feet of roadway, and the removal of five oak trees, which will result in the disturbance of an approximate 14,400 square feet. The proposed project is within the Rural Lands use category, and is located on the west side of Bridge Street of Bridge Street approximately 0.5 mile north of Main Street, north of the community of Cambria. The site is in the North Coast planning area.	Neg	10/23/2006
2006091124	200600028 Los Angeles County Department of Regional Planning Malibu--Los Angeles Modification to conditions of a recorded tract map to eliminate a debris basin in Lot 23, required by the County of Los Angeles Department of Public Works as part of their drainage concept review and approval. The required debris basin would occupy 64,500 sq. ft. (1.48 acres) and would entail grading of 6,160 cu. yd. cut and 16,900 cu. yd. fill, as well as approximately 500 feet of trenching along Piuma Road for the emplacement of a new culvert draining the debris basin to Dark Creek. The applicant proposes to upgrade two existing culverts passing beneath Piuma Road in order to obviate the need for the debris basin. Culverts would be enlarged from the existing 48" diameter to 60". The lot on which the currently required debris basin is to be constructed is an open space parcel.	Neg	10/23/2006
2006091134	South Trico Division of Oil, Gas, and Geothermal Resources Delano--Kern Proposes to drill, test, and possibly produce a gas well.	Neg	10/24/2006
2006092107	Deborah Tofft-Olavsén - Minor Subdivision - MS0701C Del Norte County Planning Department --Del Norte Minor Subdivision of a 4.32-acre parcel into two parcels approximately 2.0 acres and 2.32 acres in size. The project is located on the west side of Mudhen Road near Boomer Lane. The parcel is developed with an existing single family residence and outbuildings and is served by an on-site sewage disposal system and private well. The proposed undeveloped parcel would be served by a separate on-site sewage disposal system and private well. A biological assessment was prepared that did not identify any sensitive habitat on the project site or in its immediate surroundings. Access to the proposed parcels would be from existing encroachments from Mudhen Road.	Neg	10/23/2006

2005012113	UC Santa Cruz 2005 Long Range Development Plan, Infrastructure Improvements Project, 2300 Delaware Av., Family Student Housing Redevelopment University of California, Santa Cruz Santa Cruz--Santa Cruz The 2005-2020 Long-Range Development Plan (2005 LRDP) is a general land use plan to guide the physical development of the UC Santa Cruz campus through 2020-21. The 2005 LRDP accommodates a three-quarter average on-campus enrollment of 19,500 full time equivalent (FTE) students by 2020-21, and a summer student population of about 7,520 student FTE. Faculty and staff are projected to increase by about 1,340 to about 5,075. Development under the 2005 LRDP will implement UCSC's academic, research, student life, and housing programs and is projected to add an additional 3,175,000 gross square feet (gsf), for a total of approximately 8.0 million gsf on the main campus. The LRDP proposes circulation improvements, including a road to the north of the academic core to serve academic and support programs. The LRDP EIR provides a program-level analysis of the 2005 LRDP and project-level analyses for three development projects: Infrastructure Improvements Project, Family Student Housing Redevelopment Project, and 2300 Delaware Avenue Project. These three development projects will be the subject of separate approvals.	NOD

2006011071	Mesa View Access Road and Conversion to High School EIR Yucaipa-Calimesa Joint Unified School District Calimesa--Riverside The proposed project consists of construction of an access road in accordance with Road Access Alternative 3A to the existing Mesa View School and conversion of the school from a middle school to a high school in the year 2010. The access road would intersect with 7th Street at the current location of the entrance to the Villa Calimesa Mobile Home Park, and a four-way stop-controlled intersection would be formed between the access road, Villa Calimesa Lane, and 7th Street. The project would provide the Villa Calimesa Mobile Home Park with its own entrance road and this entrance road would not intersect with the school's private access road. Turning movement restrictions will be implemented to ensure that school trips access the Mesa View School site from Sandalwood Drive. The project requires acquisition of an additional private property to accommodate the new four-way intersection.	NOD	
2006042167	Adobe Creek Channel Maintenance Project Southern Sonoma County Resource Conservation District Petaluma--Sonoma Flood channel maintenance along Adobe Creek in Petaluma. Work in the Sartori Reach will include demolition of an existing grouted rock check structure and replacement with a rock step pool structure; installation of planted rock rip-rap for bank stabilization at a slip-out along about 40 feet of stream frontage; excavation of about 700 cubic yards of accumulated; and vegetation management throughout the reach. Vegetation management will include selective removal, thinning, and pruning of vegetation within the stream channel, and will focus on invasives such as blackberry and on trees, primarily arroyo willow, growing in the channel bottom and blocking the flow. A goal of vegetation management will be encourage the development of overstory vegetation to shade the stream. Work in the McDowell Reach primarily involves removal of sediment from the existing sediment detention basin near the McDowell Boulevard Bridge in an area approximately 250 feet long and 80 feet wide. Work will be done with a long-reach excavator operating from the top of bank. Vegetation management along the entire McDowell Reach will be as described for the Sartori Reach. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0331-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Sonoma County Water Agency. 	risk for the intended future use of the property. The proposed actions are intended to be the final remedy for this area.		
2006072111	Bajamont Groundwater Extraction and Treatment "L1" System Project Carmichael Water District --Sacramento The Proposed Project is a component of the existing groundwater containment and treatment program undertaken through a cooperative agreement between Aeroject and Carmichael Water District (CWD). Initiated in response to detection of NDMA groundwater contamination within the CWD, the proposed project is designed to arrest the down gradient spread of the contaminant plume, thereby protecting the downgradient quality of the aquifer, remediating the contaminated portions of the aquifer, and preventing additional impacts to public drinking water supply wells, including existing CWD wells. The proposed project is comprised of four primary components: a groundwater treatment plant, at least one groundwater extraction well, modifications to an existing reinforced concrete outfall, and underground pipelines.	NOD	
2006081099	Strathmore Arts and Technology Magnet Academy Porterville Unified School District --Tulare The project is a proposal by Porterville Unified School District to construct and operate a new arts/technology high school magnet campus with a capacity for 500 students.	NOD	
2006082006	Gridley Wastewater Treatment Plant Expansion Project Gridley, City of Gridley--Butte The project involves installation of upgraded equipment to the City's existing wastewater treatment plant in an effort to process additional wastewater. The proposed project will result in an increase in the design capacity from a maximum dry weather flow of 1.05 million gallons per day (mgd) to 1.7 mgd. The increase in primary and secondary treatment capacity will be achieved by significantly increasing aeration in the aeration and polishing ponds, improving mixing in the aeration pond and replacing the existing headworks with a new facility. Hydraulic upgrades consisting of yard piping and inlet/outlet modifications will be performed to maintain the required minimum 2 feet of freeboard in all ponds at peak flows. The proposed modifications to the existing aeration systems will increase the wastewater treatment plant capacity and will reduce total suspended solids (TSS) and biochemical oxygen demand (BOD) concentrations in the effluent produced.	NOD

	Agreement number 1600-2006-0503-3 pursuant to Section 1602 of the Fish and Game Code.		
2006098199	Marin County Flood Control District Mill Valley Channels Project Fish & Game #3 Mill Valley--Marin The Marin County Flood Control District proposes to excavate accumulated sediment, debris, and vegetation out of three drainage channels in order to re-establish hydraulic capacity and flood water conveyance within each channel. Activities include removal of several cubic yards of sediments from each channel, removing native vegetation such as cordgrass and pickleweed, and re-grading areas. The proposed activities will utilize small equipment and an excavator or crane; large equipment will not need to enter any of the channels. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0315-3 pursuant to Section 1602 of the Fish and Game Code.	NOE	
2006098200	Interpretive Bird-Watching Stations (06/07-CD-5) Parks and Recreation, Department of --San Diego The project consists of the construction of six bird-watching stations along selected trails within Cuyamaca Rancho State Park. Each station will consist of a sitting bench (8' long) and a pedestal with an interpretive panel. The benches and pedestals will be mounted in concrete supports. All of the benches and interpretive panels will be consistent with ADA accessibility requirements, and two of the stations will be located on ADA compliant trails. All of the stations are sited to avoid impacts to biological and/or cultural resources.	NOE	
2006098201	Regents Acquisition of Property at 1900 Third Street, City and County of San Francisco, California University of California, Planning, Design & Construction San Francisco--San Francisco The University proposes to acquire additional land adjacent to the current Mission Bay site of the San Francisco campus (UCSF). The acquisition would ensure long-term flexibility for the campus to accommodate future space needs, including the clinical needs of the UCSF Medical Center. In March 2005, the Regents approved an amendment to the San Francisco Campus Long Range Development Plan to adopt the campus' recommendation to develop three integrated specialty hospitals at Mission Bay. The preferred site, of which 1900 Third Street is a part, has been identified for: (i) future expansion of campus research and auxiliary support functions; (ii) the site of a replacement hospital for the functionally obsolete portions of the UCSF Medical Center which do not meet the Alfred E. Alquist Hospital Facilities Seismic Safety Act (Senate Bill 1953) requirements; and/or (iii) existing and planned research uses displaced from the current Mission Bay or Parnassus campus sites should a replacement hospital be developed in one of those locations. 2006092118	South Lathrop Specific Plan EIR Lathrop, City of Lathrop--San Joaquin The South Lathrop Specific Plan (SLSP) project consists of an application to annex approximately 689 acres of land in unincorporated San Joaquin County into the City of Lathrop and the approval of the appropriate entitlements to plan for the ultimate development of that area. The SLSP would be developed with residential, office, commercial, industrial, parks and open space, school and transit uses.	NOP	10/24/2006
2006091130	PM061126 / RENVT200500063 / 2233 Casitas Ave, Altadena Ca 91001 Los Angeles County Department of Regional Planning Pasadena--Los Angeles Demolish an existing single family residential dwelling unit for the construction of four detached condominium units. Each two story detached condominium will be approximately 1,000 sq. ft. with an attached two car garage. One interior private driveway/fire lane will be constructed with a single point of ingress/egress onto Casitas Avenue. The proposed project will require approximately 180 cubic yards of grading which will be balanced on site. A CUP application was submitted for the condo units in a C-M zone and an Oak tree permit application for the encroachment into the protected zone of three oak trees. Four guest parking spaces will be provided. Existing wooden fence is to be removed and replaced with concrete wall.	Neg	10/24/2006
2006091131	R2006-01176-(2)/Conditional Use Permit No. 200600081-(2) Environmental No. 200600081 Los Angeles County Department of Regional Planning Compton--Los Angeles The proposed project is a request by the Claretian Education/Missionaries for a conditional use permit to authorized the continuation of a seminary and the addition of a 2,380 square foot accessory building that includes a four-car garage, laundry room, and exercise room and storage rooms.	Neg	10/24/2006
2006091135	French Valley Airport Land Use Compatibility Plan Riverside County Airports Murrieta, Temecula--Riverside Adoption of a Land Use Compatibility Plan for French Valley Airport establishing criteria for the determination of consistency of development projects with the objectives of the State Aeronautics Act regarding the protection of public health, safety, and welfare in Airport Influence Areas.	Neg	10/24/2006
2006091136	Bikeway Transportation Plan (BTP) Project Orange County --Orange The County Bikeway Plan, a component of the County's General Plan, identifies facilities that are consistent with the OCTA Commuter Bikeways Strategic Plan (CBSP), for areas within the County's jurisdiction. However, the County's Bicycle Plan does not meet the requirements of the California Streets and Highway Code for purposes of the BTA funding program. Therefore, adoption of the OCTA CBSP will qualify the County for funding from the BTA program.	Neg	10/24/2006

	Fish and Game Code to the project operator, Karen Christensen / Santa Cruz County Resource Conservation District.		
2004122089	#02253 - Erosion Control Plan Agriculture Napa County --Napa The project is comprised of the earthmoving activities on slopes greater than 5% associated with approximately 139 acres of new vineyard development proposed by Napa Canyon LLC Vineyards. Pursuant to Chapter 18.108 of the County Code (Conservation Regulations), Erosion Control Plan Applications (ECPAs) are required for agricultural projects involving grading and earthmoving activities on slopes over 5%. Napa County is responsible for approval of ECPA pursuant to Chapter 18.108 of the Napa County Code. The ECPA was prepared in accordance with Chapter 18.108 of the Napa County Code. The project is designed to minimize impacts to water quality and environmental effects in accordance with 18.108.070 of the County Code. For CEQA purposes, the project under consideration is the earthmoving and/or grading activities occurring on slopes greater than 5% and installation of the ECP and associated vineyard development.	NOD	
2005022096	Squaw Valley Ski Area - Parking and Snow Storage Area Runoff Treatment Placer County Planning Department Olympic Valley--Placer Construction of a storm water treatment system.	NOD	
2005061177	Westgate Pasadena Pasadena, City of Pasadena--Los Angeles The applicant, Sares-Regis Group, is requesting entitlements to allow construction of a new urban village encompassing three contiguous blocks with 820 residential units and approximately 22,154 square feet of ground floor retail with 1,693 underground parking spaces. The project is intended to be transit-oriented because of its proximity (two to five blocks) to Metro Gold Line stations. A Transit-Oriented Development (TOD) is a development, located within walking distance of a major transit stop designed for pedestrians without excluding motor vehicles. Transit-oriented development can be new construction or redevelopment of one or more structures whose design and orientation facilitate transit use. The proposed project including building heights, setbacks, and street improvements is consistent with the Central District Specific Plan (CDSP).	NOD	
2005071083	Newland Street Residential Project Huntington Beach, City of Huntington Beach--Orange To: (1) amend the General Plan Land Use designation of a 23.097 acre parcel from I-F2-d (Industrial - 0.5 floor area ratio - design overlay) to RM (Medium Density Residential); (2) to amend the General Plan Land Use Element by removing the subject property from Subarea 9F of the Community District and Subarea Schedule; and (3) to amend the zoning map designation from IL-O-FP2 (Limited Industrial - Oil District overlay - Flood Plain 2) to RM-FP2 (Medium Density Residential - Flood Plain 2). These actions allow development of a 204 unit residential project and a two-acre public park.	NOD

2006098227	<p>Permanent Road Repair/Culvert Replacement along Towsley Creek Mountains Recreation and Conservation Authority --Los Angeles</p> <p>Permanent repair of two existing road crossings at Towsley Creek. Road crossings were damaged in severe storms of 2004-2005. At Site 1, the culverts were clogged and the creek cut a new channel through the road. Emergency repairs consisted of placing culverts in new channel and covering with dirt. Emergency repairs do not meet public access standards. The project involves removing the temporary pipes and backfilling, excavating and placing 3 new metal pipes in the road in line with the flow of the creek, covering with soil and rocks, laying asphalt, and installing rip-rap/concrete. The footprint of the road in the creek will be reduced. During construction, a temporary driveable path will be created with dirt and gravel in a disturbed area to cross the creek and access the lodge. At Site 2, the creek washed out the culverts during the storms and left a wide cut in the creek. Emergency repair consisted of placing small culverts. The project involves removing uncovered temporary culverts and gabions, placing new culvert in the same location, backfilling with dirt from adjacent slope, adding road base, and re-installing rip-rap/concrete.</p>	NOE

2006012089	<p>Berkeley High School South of Bancroft Master Plan Berkeley Unified School District Berkeley--Alameda</p> <p>The proposed project is the adoption and implementation of the Berkeley High School South of Bancroft Master Plan. The proposed Master Plan would provide a framework for implementation of a phase building program with approximately 69,000 square feet (sf) of new construction plus possible structure parking, to be carried out in at least three phases. On the southern portion of the high school campus, the Master Plan includes the demolition of the Old Gym building and warm water pool and redevelopment of the site with a physical education building and a classroom building; construction of new stadium facilities and bleachers; construction of space for facilities services and storage; development of an athletic quad and regulation softball field; improvements to the Bancroft Easement that traverses the campus; and landscaping and fencing improvements. On the Milvia Street site, the Master Plan provides the opportunity for the City of Berkeley to redevelop part of the site with a warm water pool; the rest of the site would be used for parking. In the near term, the parking would be in a surface lot; in the long term, a parking garage might be constructed.</p>	EIR	11/09/2006
2006022073	<p>Turlock Irrigation District Regional Surface Water Supply Turlock Irrigation District Hughson--Stanislaus</p> <p>The Turlock Irrigation District's proposed Regional Surface Water Supply Project would construct facilities to treat and deliver Tuolumne River water for use by communities that currently rely exclusively on groundwater for urban water needs. These communities include Ceres, Hughson, Keyes, south Modesto and Turlock. The proposed project would construct a water treatment plant near the intersection of Geer Road and Hatch Road, which is near Hughson in unincorporated Stanislaus County. The project would deliver up to 42.5 million gallons per day of treated water to the participating communities by constructing new pipelines between the proposed plant and those communities within existing roadways and canal rights-of-way. Diversion from the river would be accomplished using facilities already constructed and planned under TID's approved infiltration Gallery Project at Special Run. The water treatment plant would be constructed on approximately 15-20 acres of a 50-acre parcel that is currently fully developed as orchard, and is located south of the Tuolumne River and east of Geer Road. The proposed pipelines will be installed in existing canal and roadway easements between the treatment plant and participating communities. The participating communities will be responsible to construct "terminal facilities" to store and deliver water provided by TID.</p>	EIR	11/09/2006

2006098239	Piru Diversion United Water Conservation District --Ventura United Water Conservation District is seeking a new Streambed Alteration Agreement from the California Department of Fish and Game for the continued maintenance and operation of United's Piru diversion. The diversion was originally built in 1931 and has been continually operated by United since its establishment. The current diversion consists of an earthen berm that extends out across the river channel, a sluice channel, and a diversion structure with a trash rack and four inlets leading to a diversion pipe that conveys diverted water to the Piru spreading grounds. United is proposing to upgrade the facility by providing fish screens, modifying the intake structure to meet velocity criteria established by the National Marine Fisheries Service, and incorporating a natural fishway bypass channel to protect aquatic species. The proposed structural modifications are relatively minor and implementation will not result in an increase of more than 50% of the floor area of the current structure (any increase in structure size will be "landward" of the current structure, and will not result in any additional encroachment into the riverbed).	NOE	
2006098240	Sand City/Monterey Peninsula Regional Park "Big Sur Trust" Acquisition General Services, Department of Sand City--Monterey The proposed project consists of an acquisition of approximately 1.47 acres of land located adjacent to the Monterey State Beach in Monterey County. The acquisition of this property will be an addition to the existing State Beach. The project will transfer the ownership of land to the California Department of Parks and Recreation to ensure habitat protection and recreation use.	NOE	
2006098241	Install Pine Grove Visitor Center Exhibits Parks and Recreation, Department of --Mendocino Install new interior and interpretive panels, display cases, historic period furnishings, and exterior signs at the Point Cabrillo Visitor Center (formerly the reconstructed Kearn's farmhouse). Install custom display cases and replicas, originals, or models of items for interpretation of natural and cultural history. Install security alarm system and a door to the under-stair storage area to protect exhibitry and furnishings. No ground disturbance and no impacts to sensitive natural or cultural resources will occur as a result of the project.	NOE

2006099058	Tentative Tract Map No. 061973 Lancaster, City of Lancaster--Los Angeles The operator proposes to alter the streambed to develop TTN 06193. The project involves the subdivision of 5 acres into 18 residential lots. Bulldozers, dump trucks and other heavy equipment will be used to dig out, grade, fill, and level the area in preparation for the construction of single-family housing. Storm water run-off structures will be incorporated into the housing project. Grading and leveling the project area will result in the destruction of an isolated ephemeral braided stream (approximately 1 acre) within the 5 acre parcel. All vegetation will be removed during the process. The project will impact a total of 0.8759 acre of un-vegetated streambed and 0.1241 acre of riparian area.	NOD	
2006098243	Bonderson Projects Center Telecommunication -- PR 06-612 California State Polytechnic University, San Luis Obispo --San Luis Obispo The project consists of the installation of interbuilding and intrabuilding cabling systems and equipment for telecommunications in building 197.	NOE	
2006098244	Repair Road to Reservoir 3 -- JOC 05-010.013 California State Polytechnic University, San Luis Obispo --San Luis Obispo The project consists of excavating, installing bench drains, and recompacting slope along side of road to Reservoir 3.	NOE

	done by a barge crane or excavator.		
2006098255	El Capitan Temporary Summer Crossing Fish & Game #5 --Santa Barbara The Operator proposes to alter the streambed to place a temporary bridge across the creek during the summer months, when the creek is dry. The bridge is a light vehicle/pedestrian wooden structure, on skids, which is pulled into place with a chain, by a tractor. The bridge is 12 feet by 30, and shall be removed prior to any storm which may cause water to flow within the creek, or by December 1, whichever comes first. All other portions of the project, if they are outside the 100 foot buffer zone, are outside the jurisdiction of this agreement.	NOE	
	SAA# 1600-2004-0462-R5		
2006098256	Adams Canyon Ranch Road Way Maintenance Fish & Game #5 Santa Paula--Ventura The Operator proposes to alter the streambed by maintaining the existing crossings (18 crossings on Adam Canyon and 6 on Haines Canyon). Culverts will be placed in all crossings, if flows are disrupted by the use of cobble. If cobble is more appropriate, it will be utilized. Maintenance will include the regarding of the crossings and the placement of clean washed river cobbles to prevent sediment to travel downstream. Straw bales will be placed in wet (flowing or ponded water) to capture and sediment. Straw bales will be removed upon completion of work. All work will be conducted during low or no flow periods. Culvert replacement or repair will be conducted following the guidelines provided in DFG Culvert Criteria for Fish Passage dated May 2002. Current stockpiled materials will be relocated away from the streambed. Bank erosion will be repaired with clean native soils and BMP's will be implemented. No native vegetation will be removed by the activities.	NOE	
	SAA# 1600-2004-0563-R5		
2006098257	Brannan Island Ramp Widening Boating and Waterways, Department of --Sacramento Project will temporarily remove four of the six existing boarding floats and store them onsite. Three boat ramps currently exist. The project proposes to construct new ramps in the two areas between the existing ramps resulting in one wide ramp with six boarding floats on the ramp.	NOE	
2006098258	Grasslands State Park Boat Ramp, Parking and Restroom Boating and Waterways, Department of --Merced The current boat launch in the park is a primitive dirt slope that frequently causes vehicles to get stuck. This project will construct a single lane concrete boat ramp with an asphalt turnaround and parking area for approximately 18 vehicles with trailers. An asphalt road will also be constructed along with a 2-stall vault toilet on a berm above the high water line at the edge of the parking area.	NOE

2006094005	EA for Transfer of ~ 18 acres of Federal Property to the March JPA U.S. Army Reserve Moreno Valley--Riverside Transfer of approximately 18 acres of Federal government property to the March Joint Powers Authority.	EA	10/30/2006
2003011131	Malibu La Paz Ranch Development Agreement Malibu, City of Malibu--Los Angeles The proposed project includes the development of three separate commercial development projects for a total development of 132,058 sf of commercial floor area, including commercial office and retail space and a City Hall. The architecture is envisioned as Mediterranean with modern updates, with maximum building heights not exceeding 24 feet at the base of the roof level and 34-feet in height as measured from the highest point of articulated roof elements. A summary of the total proposed development for all three parcels combined is as follows: - 112,058 square feet of commercial retail and office space; - 20,000 sf City Hall; and - 609 parking spaces.	EIR	11/13/2006
2004091106	Atwater Ranch Atwater, City of Atwater--Merced The project which is approximately 395 acres will consist of a General Plan Amendment, Pre-Zone, Vesting Tentative Subdivision Map, Development Agreement, Annexation and a Specific Plan. The proposed annexation area contains approximately 620 acres, located within Merced County in the southeast portion of the City of Atwater. The annexation area is contiguous with the existing City limits at the north end and is bounded by Giannini Road and Swan Road on the east, White Crane Road on the south and Applegate Road on the west.	EIR	11/13/2006

2004092077	Gentry-Suisun Project Suisun, City of Suisun City--Solano The proposed Gentry-Suisun project includes Five Planning Areas, consisting of 492.5 acres. The project also involves the annexation of approximately 87.82 acres for a mixed-use project. The remaining area of the site would remain open space. The project also involves requests for Suisun City General Plan Amendments in order to accommodate the proposed project, as well as the rezoning.	EIR	11/13/2006
2005071033	The Lakes Area Plan Los Banos, City of Los Banos--Merced The proposed project includes residential, commercial, and recreational uses. There would be 607 residential units, including 483 single-family residences and 124 townhouses. The proposed project would have a net density of approximately seven units per acre for the single-family residential component and 9.76 units per acre for the townhouses. The recreational facilities would consist of a 37-acre artificial lake, marina, tot lots, open spaces, parks, and swimming pools. The commercial site would overlook the lake and include an 8,000 square-foot restaurant and 20,000 square feet of retail space. The Lakes Area Plan includes applications for the following components: annexation, including the area plan and detachment from the Central California Irrigation District, general plan amendment from Agriculture and Low Density Residential to Low Density Residential and Commercial, Pre-zoning to PD (Planned Development), Pre-annexation development agreement.	EIR	11/13/2006
2005081077	Chula Vista Bayfront Master Plan and Port Master Plan Amendment San Diego Unified Port District Chula Vista--San Diego Redevelopment of approximately 562 acres of land under both the SDUPD and the City of Chula Vista jurisdictions. The proposed project, which is intended to occur in three phases over a 25-year period, includes development of a resort conference center, hotels, residential, mixed-use office/commercial, retail, parks and open space, new or improved roadways, pedestrian routes, water and sewer systems improvements, reconfigured commercial harbor, and realigned navigation channel. The proposal involves amendments to the Port Master Plan and the City of Chula Vista General Plan and Local Coastal Program, as well as the approval of a land exchange.	EIR	11/27/2006
2005091142	Santa Monica College Bundy Campus Master Plan Santa Monica Community College District Los Angeles, City of--Los Angeles The Bundy Campus Master Plan is a long-range planning document that establishes a legal framework to guide the future operation and development envisioned for the campus. Buildout of the Master Plan calls for: (1) demolition of the existing two-story East Building with possible interim uses pending demolition; (2) construction a New Building of similar size (approximately 33,205 sf) to be located east of the existing four-story West Building; (3) provision of ~ 780 parking spaces (530 surface and 230 below-grade spaces); (4) access improvements including a new northeast driveway to access the campus; (5) provision of a pedestrian parkway along Bundy Drive; (6) landscaping/open space elements; (7) continued use for the West Building; and (8) miscellaneous general site improvements. 	adults aged 55 and older. The proposed Specific Plan would also provide for over half of the Specific Plan Area to remain as natural open space.		
2006091155	Indian Palms Country Club and Resort Conceptual Specific Plan / Project Master Plan Amendment, Subdivision Map, and Conditional Use Indio, City of Indio--Riverside The project consists of several entitlements including an amendment to the current Conceptual Specific Plan/Project Master Plan, a Conditional Use Permit, a Tentative Tract Map, and Design Review leading to the redevelopment and renovation of 23 acres in the Indian Palms Resort.	NOP	10/30/2006
2006091160	Enterprise Zone Designation Pasadena, City of Pasadena--Los Angeles The proposed project consists of a reapplication of the City's Enterprise Zone and adding the portion of the Colorado Boulevard corridor from Catalina Avenue to South Altadena Drive into the Enterprise Zone. The purpose of the Enterprise Zone is to stimulate growth in the designated economically distressed areas by making additional State and local incentives and programs available to businesses within the zones. The ideal result of the Enterprise Zone would be the ultimate buildout of commercially and industrially zoned property within the zones in accordance with the City of Pasadena's Comprehensive General Plan and Zoning regulations.	NOP	10/30/2006
2006091161	Drilling and Equipping Wells 30 and 31 Colton, City of Colton--San Bernardino The project consists of constructing, equipping, and operating two domestic water production wells in the City of Colton on two adjacent City-owned parcels. The project is anticipated to include the following activities: site clearing and fencing; drilling the wells, casing the wells, developing the wells using air-lift equipment, and testing of the wells using a temporary diesel-driven pump; disposing of development and testing water; installing pumping units, motors, electrical switchgear, and electrical power service, installing valves, site piping, and appurtenances; installing disinfection facilities; installing discharge piping from pump discharges to Ashley Way (northerly of the project site); painting of aboveground facilities; constructing enclosures for protection of aboveground facilities; disinfecting the wells; start-up of the well pumping plants; and operating the wells and well pumping plants. Development, testing, and operational water discharges will be discharged to an onsite storm drain inlet leading to the Reche Canyon Channel, located adjacent to and southerly of the project site.	Neg	10/30/2006
2006092126	IS/MND for TTM 04-1008 Red Bluff, City of Red Bluff--Tehama The proposed project will subdivide one existing lot, totaling approximately 132.5 acres, into 45 single-family residential lots and designated remainder. One residential dwelling is proposed on each of Lots 1 through 45, resulting in a project density of 4.4 dwelling units per acres. Lot sizes will be consistent with city standards. The developed area with total approximately 10.8 acres with the remainder totaling approximately 121.7 acres. Extensions of the existing Spyglass Drive and Palmer Court will provide access to the proposed development. Road A will be an east-west access connecting Palm Court to proposed Road B. Road B	Neg	10/30/2006

	will run roughly north-south, intersecting with Spyglass Drive to the north and terminating between lots 8 and 9 for potential future development. Road C is a north-south street stub, designed to provide future access from northern and eastern adjacent and surrounding properties. Sewer (sanitary and stormwater) and water services will be provided by the existing City of Red Bluff facilities.		
2005111094	Tentative Map 2005-1 (Award Homes Subdivision and Specific Plan Amendment) Hollister, City of Hollister--San Benito The proposed project would subdivide a substantial portion of the remaining undeveloped acreage of the West of Fairview Specific Plan area into 517 single-family homesites on standard individual lots, 60 "garden homes" on clustered lots, and 100 apartments on a single 4.6-acre lot. In addition to the 578 residential lots, the proposed subdivision would provide 16 undeveloped lots. These include 8 lots that would comprise an open space greenway (linear park) along the primary collector road serving the development and bisecting the site from north to south, a 1.5 acre detention basin lot, and a 0.46 acre lot crossed by Santa Ana Creek in the northeast corner of the site would remain undeveloped and would be dedicated to the City for park use. The other 6 undeveloped lots would consist of private streets serving the clustered residential parcels.	SIR	11/13/2006
2004072056	Big Lagoon Park Company Humboldt County Planning Department --Humboldt The proposed General Plan Amendment/Zone Reclassification application would amend the Humboldt County North Coast Area Plan LCP on APN 517-121-10. The proposal would reconfigure the location of the boundary between the Residential Estates General Plan designation/Residential. A Planned Unit Development (PUD) combining zone is also proposed for the residential portion. As the property is in the Coastal Zone, a "blanket" Coastal Development Permit is requested to cover the relocation of 14 existing cabins between the present time and 2065.	NOD	
2004112063	Master Permit for Env. Enhancement Projects Santa Cruz County Capitola--Santa Cruz The objective of this project is to reduce sediment runoff from a steep unpaved portion of a private road in the Deer Creek watershed, within the greater San Lorenzo River watershed. This project will improve road drainage in order to decrease sediment runoff into Deer Creek. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0355-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Karen Christensen / Santa Cruz County Resource Conservation District.	NOD	
2005102069	Cascade Shores Wastewater Treatment Plant Project Nevada County Department of Transportation & Sanitation Nevada City--Nevada The proposed project consists of new secondary treatment, filtration, and disinfection facilities that will enable the District to comply with their NPDES permit requirements. 2006099053	<p>Miller Creek Sediment Removal Project Marin County --Marin</p> <p>The applicant proposes to grade the banks of Miller Creek and excavate 300 feet downstream and 400 feet upstream (700' total), of stream channel under Rail Road Bridge. An unknown amount of gravel and other sediments has accumulated in gravel bars under and near the Bridge. Currently, there are several sediment bars extending both above and below the bridge. The proposed activity is an effort to remove accumulated sediment from below and near the Rail Road Bridge in order to restore hydraulic capacity in the stream channel and prevent flooding in the immediate area. A small bulldozer will be used to move sediments to a removal point. An excavator, working from top of bank, will remove the sediment that shall be compacted into the surrounding roads. Work will be performed when the creek is dry. Several stands of Arroyo Willow (<i>Salix lasiolepis</i>) will be partially trimmed and all disturbed areas will be replanted with multi-story native vegetation.</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0433-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Steve Grant.</p>	NOD	
2006099054	<p>Marin County Open Space District Top Flight Trail Project Marin County --Marin</p> <p>The proposed project is part of a large trail relocation and reconstruction effort within the French Ranch Open Space Preserve. Elements of the proposed project subject to this permit's Terms and Conditions include: replacing two existing wet trail crossings with clear-span bridges. A limited amount of riparian vegetation (consisting primarily of oak, willow, fir, coyote brush, blackberry, etc.) will be pruned or removed to facilitate placement of each bridge abutment. As mitigation for the removal of limited amounts of vegetation the applicant has proposed to plant willows or other appropriate native riparian species in order to replace lost cover and stabilize the creeks banks in the immediate vicinity of the project area.</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0626-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, James R. Raives.</p>	NOD	
2006098276	<p>Larkspur Creek Bank Stabilization Project Fish & Game #3 Larkspur--Marin</p> <p>The proposed project restoration efforts focus activities on the left bank immediately downstream of the Magnolia Avenue box culvert and the 200-foot channel reach immediately east of the Lark Creek Inn facilities. Work immediately downstream of the box culvert will consist of stabilizing the toe of the bank with vegetated riprap. This will entail removing the remnants of the existing willow wattle fence and placing approximately 40 linear feet of vegetated riprap to an elevation equivalent to the 2-year flood water level. The riprap will be keyed into the channel bed and bank below scour to form a stable foundation. Riprap will be sized for the 100-year flood flow event. Upslope of the riprap toe, artificially placed debris will be removed and the entire slope backfilled and graded to a 2:1 slope. All surfaces will be revegetated with native, shade-tolerant plants (e.g., Snowberry, Creek dogwood, etc.). In addition to stream bank stabilization and restoration</p>	NOE

	actions, the exposed portion (approximately upper 2-feet) of the downstream gravel bar will be excavated and removed to reduce the size of this geomorphic feature. Issuance of a Streambed Alteration Agreement Number 1600-2006-0619-3 is pursuant to Fish and Game Code Section 1602.		
2006098277	San Anselmo Creek Bank Stabilization Project Fish & Game #3 Fairfax--Marin The proposed project includes constructing an approximate 100-foot-long vegetated rip-rap toe wall, placing geo-textile fabric beginning at least 4 feet beyond the top-of-bank extending down to the estimated Ordinary High Water Mark (OHW) and "rearranging" the existing boulder weir immediately upstream the failing stream bank. Above the rip-rap toe wall, the entire upper bank area shall be composed of imported or local native alluvium and top soil in the upper 2 ft horizon and vegetated with live willow poles where applicable. The finished graded slope shall be hydroseeded or seeded with California native grass and covered with biodegradable medium-weight or heavy-weight erosion control blanket. Issuance of Streambed Alteration Agreement Number 1600-2006-0416-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098278	San Anselmo Creek Bank Stabilization Project Fish & Game #3 Fairfax--Marin The proposed project includes a live willow pole vegetated 1/4-ton, 3-ft thick rock rip-rap bank extending from below the water line (min 3-ft below the adjacent min channel bed elevation) to approximately 9 ft above the water surface to min elevation 111 ft at max finished face slope 1(H):1(V). The rip-rap bank will be designed and constructed to avoid damaging the existing intact remnant of the former toe of bank that contains native riparian trees and roots. The exposed toe of the bank in this intact section will be heavily planted with live willow poles to improve its stability. The toe of the bank on the gravel bar would be planted with native alder 1-gal container plants (not less than 4). The upper bank from the top of the proposed rip-rap bank to the landscaped private residential area at approximately elevation 118 ft is to be stabilized by laying back the bank to maximum stable slope 1.5(H):1(V) using grading and mechanically stabilized earth (MSE) soil lifts if and where minimum fill may be necessary, and covering the finished native soil slope with biodegradable erosion control fabric, planting with native shrub and tree 1 gal container plants (not less than 1 per 40 sq ft plan area, and establishing a drip irrigation system to irrigate upper bank plantings). The applicant expects to be able to perform all construction from top of bank, not entering the stream channel or de-watering an area within the vicinity of the project. Issuance of a Streambed Alteration Agreement Number 1600-2006-0630-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098279	Glenwood Creek Bank Repair Fish & Game #3 San Rafael--Marin The applicant proposes to install a beam and lag wall to prevent loss of property. Elements of the project include installation of drilled piers to support the wall, grading and finishing a 2:1 slope above the wall, and temporary cut and fill of native material in order to finish the structure. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0497-3 pursuant to Section 1602.	NOE

2006098280	7200 Saint Helena Road Fish & Game #3 Santa Rosa--Sonoma The project will protect an eroding section of the bank of Mark West Creek by placing 1/2 ton rock rip-rap along approximately 120 feet of stream bank. Voids in the rock will be filled with earth and live willow cuttings will be planted. The rip-rap placed for this project will replace rip-rap improperly placed a few years earlier. Issuance of a Streambed Alteration Agreement Number 1600-2006-0290-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098281	Giacomini Culvert Replacement Fish & Game #3 --Marin The proposed project involves restoring a roadbed and replacing the existing 30-inch culvert with a 48-inch culvert. The project also includes the use of a cofferdam to dewater the stream during construction and the installation of the following features: (1) a single-post trash rack; (2) a 100 square feet of inlet protection; and (3) a 300 square foot energy dissipator. The project will not expand or otherwise change the uses of the road. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0631-3 pursuant to Section 1602.	NOE	
2006098282	Fairfax Creek Bank Stabilization Project Fish & Game #3 Fairfax--Marin The proposed project includes constructing an approximate 120-foot-long Terramesh system retaining wall placing Terramesh geo-textile fabric on the upper areas of the wall/bank top-of-bank extending down to the estimated Ordinary High Water Mark (OHW). Below OHW, a combination of rock rip rap (approximately 2400 cubic feet) and Mac-Tex and Terramesh geo-textile fabric will be utilized to stabilize the toe of the structure. Above the rip-rap toe wall within the upper area of the wall/bank, the area shall be composed of imported or local native alluvium and top soil vegetated with live willow poles or other appropriate native species. The applicant expects to be able to perform all construction from top of bank, not entering the stream channel or de-watering an area within the vicinity of the project. Issuance of a Streambed Alteration Agreement Number 1600-2006-0505-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098283	Sonoma Creek Bank Repair Fish & Game #3 --Sonoma Protect a section of the bank of Sonoma Creek that experienced severe erosion during the January 2006 storms, and an existing house located 5 to 7 feet from the current top-of-bank, by placing rock rip-rap along approximately 60 feet of fill voids that eroded in the bank. The rip-rap will be interplanted with native riparian trees. Issuance of a Streambed Alteration Agreement Number 1600-2006-0543-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098284	Pistol Creek Bridge Replacement and Channel Restoration Project Fish & Game #3 Healdsburg--Sonoma The project is to repair storm damage to a bridge over Turtle Creek, aka Pistol Creek. The repair will consist of repairs at two adjacent sites. The downstream site includes removal of an existing wooden bridge and associated concrete	NOE

	abutments that were severely damaged by the January 2006 storm, replacement with a new bridge placed on piles, regrading the eroded channel to a stable geometry, and stabilization of the channel with rock and live willow plantings. The new bridge will be placed so that the bottom will be a minimum of two feet above the 100-year flow elevation. The upstream site involves stabilizing a section of the south bank to protect the embankment of an existing off stream reservoir located adjacent to the stream. Between the two sits, two headcuts in the stream channel will be stabilized to prevent further channel degradation and associated bank failures. Issuance of a Streambed Alteration Agreement Number 1600-2006-0412-3 is pursuant to Fish and Game Code Section 1602.		
2006098285	Geysers Road Cross Culvert Repair Project Fish & Game #3 Healdsburg--Sonoma Replacement of an existing 36-inch diameter, culvert in the channel of Lovers Gulch Creek, tributary to Little Sulphur Creek. Issuance of a Streambed Alteration Agreement Number 1600-2006-0362-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098286	Sempell Bank Repair Fish & Game #3 --Sonoma The project will repair a landslide on the bank of the Russian River by pulling back the material that slid out and placing rock rip-rap along approximately 60 feet of river bank. All work will be done well back from the low flow channel of the river. A subdrain will be installed along the top of the restored embankment to remove excessive water which could cause future sliding. Issuance of a Streambed Alteration Agreement Number 1600-2006-0426-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098287	Anderson Bank Restoration Fish & Game #3 Sonoma--Sonoma The project will protect a severely eroded section of the bank of Carriger Creek by placing rock rip-rap along approximately 500 feet of stream bank. A small quantity of gravel backfill will be placed on the bank at some locations to fill voids that eroded in the bank. The rock rip-rap will be placed on a 2:1 slope and will be planted with willows. Issuance of a Streambed Alteration Agreement Number 1600-2006-0453-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006098288	Smart Rooms Remodel -- JOC 05-011.004 California State Polytechnic University, San Luis Obispo San Luis Obispo--San Luis Obispo The project consists of installing cabling for eight smart rooms.	NOE	
2006098289	Fiber Installation from Building 11 to 13 -- JOC 05-011.005 California State Polytechnic University, San Luis Obispo San Luis Obispo--San Luis Obispo The project consists of installing approximately 1300 feet of new 48-count Siemens Freedom fiber optic cable from building 11, room 101 and building 13, room 105 through existing conduit pathway that goes through signal manholes 42 and 33 on N. Perimeter Road.	NOE

2006098303	Glenwood Creek Bank Repair Fish & Game #3 San Rafael--Marin The applicant proposes to install a beam and lag wall to prevent loss of property. Elements of the project include installation of drilled piers to support the wall, grading and finishing a 2:1 slope above the wall, and temporary cut and fill of native material in order to finish the structure. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0497-3 pursuant to Section 1602.	NOE	
2006098304	Rainbo Boyd, Applicant Permit & Case No.: ZR-05-05, LLA-05-11, DS-05-16 File No.: APN 216-261-37, -55 Humboldt County Community Development Services --Humboldt A proposed Lot Line adjustment between two parcels to accommodate an existing barn built over a common property line. The proposed Lot Line Adjustment will adjust approximately 15,750 sf or 0.36 acre from APN 216-261-55 and add it to APN 216-251-37 resulting in two parcels of 0.71 acre and 3.12 acres, respectively. The proposed Lot Line Adjustment will not require the relocation of any easements or utilities. APN 216-261-37 has pending Building Permits to remedy both the existing barn and existing residence, both of which were built without permits. APN 216-261-55 is currently vacant. The area is served by community water and individual on-site sewage disposal systems. The project includes a minor Zone Boundary Adjustment to accommodate the movement of the line between two zoning districts.	NOE

<u>Documents Received on Friday, September 29, 2006</u>			
2006098305	<p>St. Johns Canyon Channel Erosion Damage Repair - Final Design Metropolitan Water District of Southern California Hemet--Riverside</p> <p>The St. Johns Canyon Channel was constructed in 1999 as an element for the Metropolitan Water District of Southern California (Metropolitan) Diamond Valley Lake East Dam. It was designed to capture storm water runoff and to protect Goodhart Canyon Detention Basin from flooding. Recent development within tributary areas upstream of Metropolitan's property has increased storm runoff. The concrete channel has eroded as a result of storm runoff, which has created voids on the underside of the concrete lining. In some locations, the concrete lining has cracked and has displaced sufficiently to require replacement. Prompt repairs are warranted to arrest the degradation of the lining. Metropolitan proposes to repair final design for repair of erosion damage at St. Johns Canyon Channel.</p>	NOE	
2006098306	<p>Palos Verdes Reservoir - Final Design Metropolitan Water District of Southern California Rolling Hills--Los Angeles</p> <p>The Metropolitan Water District of Southern California (Metropolitan) Palo Verdes Reservoir has a 28-acre Hypalon floating cover. The floating cover is approaching 20 years old and is at the end of its useful life. In the past, the floating cover has experienced numerous tears in the cover material. Repair of these tears has become increasingly difficult due to aging of the material. Recently, Metropolitan discovered deterioration of the underside of the cover over large areas. In addition, the reservoir's existing gunite-concrete surface has several areas of damage, which will require installation of a new membrane liner and subdrain system to collect and convey flows, and to reduce excess hydrostatic pressures. Metropolitan will coordinate with the California Department of Health Services for appropriate inspection and maintenance activities at Palos Verdes Reservoir during the interim period until a new floating cover is installed. Metropolitan is proposing to prepare final design for the replacement cover and associated repairs.</p>	NOE	
2006098307	<p>Robert A. Skinner Finished Water Reservoir - Preliminary and Final Design Metropolitan Water District of Southern California --Riverside</p> <p>The Robert A. Skinner Finished Water Reservoir (FWR) has a 16-acre Hypalon floating cover. Small tears were discovered in the cover during routine inspection and maintenance. The tears were caused by delamination, or separation between the multiple layers of the Hypalon cover material. Since delamination was not observed during any prior inspections, it appears to have occurred recently and relatively quickly. As an interim measure, Metropolitan has reinforced suspect areas to prevent further damage. Due to the importance of the FWR to Skinner plant operations, Metropolitan is proposing to proceed promptly with preliminary and final design of a replacement cover. The existing floating cover was constructed prior to implementation of recently updated California Department of Health Services (CDHS) guidelines for design and functionality of floating covers. Upgrades are required for the replacement floating cover to comply with the new guidelines, and approval of the design by CDHS is required.</p>	NOE

2006098308	<p>Colorado River Aqueduct Fault Current Protection and 230 kV and 69 kV Disconnect Switch Replacement - Preliminary Design Metropolitan Water District of Southern California --San Bernardino, Riverside</p> <p>The Colorado River Aqueduct (CRA) is a 242-mile long conveyance system, which transports water from Lake Havasu to Lake Mathews. The CRA consists of five pumping plants, 124 miles of tunnel, 63 miles of concrete-lined canal, 55 miles of cut-and-cover conduit, inverted siphons, and reservoirs. The Metropolitan Water District of Southern California (Metropolitan) proposes to assess the existing power grid characteristics, the requirements for upgrading motor circuit breakers and related electrical equipment, and will conduct preliminary design to upgrade circuit breakers at the five CRA pumping plants. Additionally, Metropolitan proposes to evaluate alternatives for replacement of the disconnect switches at the CRA pumping plants' 230 kV and 69 kV switchyards, including the switch operators, and will perform preliminary design.</p>	NOE	
2006098309	<p>Rialto Pipeline Repair - Final Design and Construction Metropolitan Water District of Southern California Fontana--San Bernardino</p> <p>The Metropolitan Water District of Southern California recently conducted electromagnetic inspections, which revealed eleven 20-foot-long pipe sections with anomalous readings as to the integrity of the prestressing wires. The extent of the damage, if any, at these locations could not be interpreted by the electromagnetic inspections due to the presence of internal steel bands within the pipeline. The bands were installed in 1989, to minimize leakage from "broken back" cracks discovered within the pipeline. Cracks in "broken backs" expose these pipe sections to accelerated rates of corrosion and eventual leakage. The steel bands provide no structural support to prevent pipe rupture. All eleven pipe sections should be removed and replaced with welded steel pipe sections. The recommended repairs will occur in three phases in order to minimize the duration of pipeline shutdowns by taking advantage of other planned improvements to the Rialto Pipeline that will install three isolation structures. Metropolitan is proposing the preoperation of final design and construction of the Phase I repair of one segment of the pipeline.</p>	NOE	
2006098310	<p>Freezeout Creek Trailhead - Temporary Public Amenities Parks and Recreation, Department of --Sonoma</p> <p>Install temporary gate, information display, signs and portable restroom (compliant with the ADA) at the Freezeout Creek Trailhead at the new Willow Creek acquisition approximately 1/3 mile SSE of the intersection of Freezeout Road and Moscow Road within Sonoma Coast State Beach. The project will require the excavation of several holes for the installation of the gate, information station and signs and minor grading and fill for the installation of the portable restroom. Following completion of General Plan/EIR, specific plan and funding, permanent facilities will replace temporary facilities. Project supports continued use and visitor service.</p>	NOE	
2006098311	<p>Pacific View Residence Water Line Replacement Parks and Recreation, Department of --Sonoma</p> <p>Repair and replace a failed domestic water supply line within Sonoma Coast State Beach. 	improve habitability of the residence, supporting continued use and maintenance of a publicly owned facility.		
2006098312	Test Wells - Armstrong Redwoods Parks and Recreation, Department of --Sonoma Drill up to six test wells within Armstrong Redwoods State Reserve to identify an adequate water source for the development of a future potential water well to supply a portion of public use facilities. Each site will be accessed by truck with a mounted drill rig; ground disturbance will be approximately one square foot and all drilling fluids will be self-contained using a shaker machine with an above ground storage device.	NOE	
	If any previously-undisturbed soil is excavated (outside the septic tanks), park staff will monitor for signs of archaeological remains (e.g. white sea shell, stone tools, etc.). If any archaeological remains are encountered, work shall be immediately halted within 30 feet of any such find until a DPR-qualified archaeologist has evaluated the material and determined a course of action to be implemented before work at the site may resume.		
2006098313	State Parks Grant for Remodel of the San Juan Bautista Community Center San Juan Bautista, City of San Juan Bautista--San Benito The City of San Juan Bautista is requesting a grant from the California Department of Parks and Recreation for purposes of remodeling the City's Community Center which is identified in the City's historic inventory (built in 1920 in the Mission Revival architectural style).	NOE	
2006098314	Solano Irrigation District - Installation of New Agricultural Deepwell DW53 which will be a Replacement of DW1 Well Constructed More than 40 Years Ago Solano Irrigation District Dixon--Solano This project will replace an aging agricultural deepwell facility known as DW1 which has declined in capacity and usefulness because of age to reinstate capacity within the District's Weyand pipeline system, and supplement flow from another nearby agricultural deepwell, DW2. The deepwell being replaced, DW1, is located approximately 1,000 feet south of Midway Road, and approximately 2,000 feet away from the proposed deepwell. As part of the project, a new well will be drilled, and a new well pump and the well will be connected to the existing Weyand Pipeline to add capacity to the existing system. DW1 will be left in service until it declines further for use in emergency conditions to benefit the capacity of the system until the District deems it no longer usable, at which point it will be capped and abandoned according to County requirements.	NOE	
2006098315	Pacific Gas and Electric Company Fresno-1 Former Manufactured Gas Plant (MGP) Site Removal Action Workplan for an Interim Remedial Measure (IRM) for Soil Stabil Toxic Substances Control, Department of Fresno--Fresno The measure consists of spraying a soil stabilizer on the site's northern three acres for dust control and to minimize direct contact with the soils. The approximately 13 acre site contains by-products and residues from gas manufacturing plants. The contaminated portion of the site is vacant with mostly bare ground and some debris, trash, and voluntary plants/weeds.	NOE
